## Detailed technical data

## **Features**

| Sub product family      | deTec4 Core  |
|-------------------------|--|
| Application             | Normal industrial environment  |
| System part             | Receiver   |
| Compatible sender       | 1211462  |
| Resolution              | 30 mm  |
| Scanning range          | 15 m   |
| Protective field height | 300 mm   |
| Response time           | 10 ms  |
| No blind zones          | Yes  |
| Synchronization         | Optical synchronisation  |
| Items supplied          | Receiver Test rod with diameter corresponding to the resolution of the safety light curtain Safety instruction Mounting instructions Operating instructions for download |

# Safety-related parameters

| Туре  | Type 4 (IEC 61496-1)                   |
|---|--|
| Safety integrity level  | SIL3 (IEC 61508)                       |
| Category  | Category 4 (ISO 13849-1)               |
| Performance level   | PL e (ISO 13849-1)                     |
| $\ensuremath{PFH_D}$ (mean probability of a dangerous failure per hour) | $3.7 \times 10^{-9}$                   |
| T <sub>M</sub> (mission time)   | 20 years (ISO 13849-1)                 |
| Safe state in the event of a fault                                      | At least one OSSD is in the OFF state. |

# **Functions**

| Protective operation                                | ✓ |
|---|---|
| Automatic calibration of the protective field width | ✓ |

## Interfaces

| System connection   | Male connector M12, 5-pin |
|---------------------|---------------------------|
| Length of cable     | 150 mm                    |
| Cable diameter      | 4.3 mm                    |
| Cable bend radius   |                           |
| Stationary position | > 12 x cable diameter     |
| Flexible use        | > 15 x cable diameter     |
| Display elements    | LEDs                      |

# Electrical data

| Protection class                        | III (IEC 61140)  |
|---|--|
| Supply voltage V <sub>S</sub>           | 24 V DC (19.2 V 28.8 V)  |
| Ripple                                  | ≤ 10 %   |
| Power consumption typical               | 1.63 W (DC)  |
| Output signal switching devices (OSSDs) |  |
| Type of output                          | 2 PNP semiconductors, short-circuit protected, cross-circuit monitored $^{1)}$ |
| ON state, switching voltage HIGH        | 24 V DC (V <sub>S</sub> - 2.25 V DC V <sub>S</sub> )                           |
| OFF state, switching voltage LOW        | ≤ 2 V DC   |
| Current-carrying capacity per OSSD      | ≤ 300 mA   |

 $<sup>^{1)}</sup>$  Applies to the voltage range between  $\mbox{-30 V}$  and  $\mbox{+30 V}.$ 

# Mechanical data

| Dimensions       | See dimensional drawing   |
|------------------|---------------------------|
| Housing material | Aluminum extruded profile |

## Ambient data

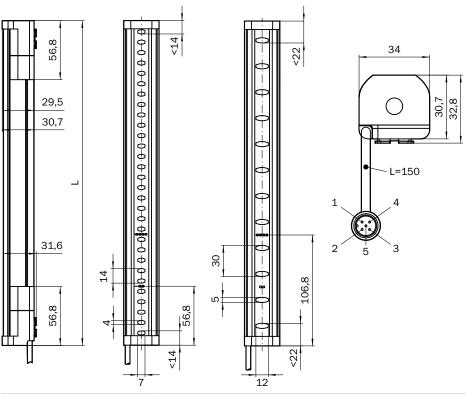

| Enclosure rating              | IP65 (IEC 60529)<br>IP67 (IEC 60529) |
|-------------------------------|--------------------------------------|
| Ambient operating temperature | -30 °C +55 °C                        |
| Storage temperature           | -30 °C +70 °C                        |
| Air humidity                  | 15 % 95 %, Non-condensing            |
| Vibration resistance          | 5 g, 10 Hz 55 Hz (IEC 60068-2-6)     |

#### Connection diagram

deTec4 Core safety light curtain to RLY3-OSSD2 safety relay

#### Task

Connection of a deTec4 Core safety light curtain to RLY3-OSSD2.

Operating mode: with restart interlock and external device monitoring.

#### **Function**

When the protective field is clear, the OSSD1 and OSSD2 outputs carry voltage. The system can be switched on when K1 and K2 are in a fault-free de-energized position. The RLY3-OSSD2 is switched on by pressing S1 (pushbutton is pressed and released). The outputs (contacts 13-14 and 23-24) switch the K1 and K2 contactors on. When the protective field is interrupted, the OSSD1 and OSSD2 outputs switch the RLY3-OSSD2 off. Contactors K1 and K2 are switched off.

#### **Fault analysis**

Cross-circuits and short-circuits of the OSSDs are recognized and lead to the locking status (lock-out). A malfunction with one of the K1 or K2 contactors is detected. The switch-off function is retained. In the event of manipulation (e.g., jamming) of the S1 pushbutton, the RLY3-OSSD2 will not re-enable the output current circuits.

#### Comments

1) Output circuits: These contacts are to be connected to the controller such that, with the output circuit open, the dangerous state is disabled. For categories 4 and 3, the integration must be dual-channel (x/y paths). Single-channel integration in the control (z path) is only possible with a single-channel control and by taking the risk analysis into account.

These contacts must be incorporated into the control such that the dangerous state is brought to an end if the output circuit is open. For categories 4 and 3, they must be incorporated on dual-channels (x, y paths). Single-channel incorporation into the control (z path) is only possible with a single-channel control and taking the risk analysis into account.

# SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is "Sensor Intelligence."
